As a Finance student, whose working towards an AI in business certificate, knows the power of investing into ones' future endeavors. Having a background in Finance allows me to have domain knowledge in the business field, and as well with the investment that A.I. can achieve is vast.

With my innate thrive for learning, I tend to venture into different aspects in business, especially with A.I. being a hot new market and tool.

Throughout my college career, we had various different projects using different A.I. programs. Such as:

- Association Rules
- Standard Diffusion
- Conventional Neural Networks
- Deep Learning
- Machine Learning

Sincerely,

Angel Martinez-Diaz
